Deerskin Back with Cowhide Palm Stick Welding Glove

SPECIFICATION SHEET

Description

The Tillman Deerskin Welding Glove is a very popular glove for pipeline stick welding applications. The 855 is great for withstanding the high heat from stick welding applications.

Made of supple Deerskin on the back of the hand and durable Cowhide on the palm, the 855 resists cracking, stiffening, and maintains the soft feeling in hot environments while protecting hands. The welted fingers contain an extra leather layer between fingers for added spark resistance and durability.

A reinforced thumb gives you the great gripping power needed for heavy-duty welding. A foam lined back provides additional protection from heat and flame protection while providing the dexterity needed.

Features

- Premium Deerskin and Cowhide stays soft even when hot.
- 14" length.
- Durable Welted fingers protect stitching.
- Reinforced thumb for added strength.
- Cotton/foam lined back for added heat protection, unlined palm for enhanced dexterity.
- Sewn with DuPont™ Kevlar® for added strength
- Sizes: M, L, XL

Glove Material: Deerskin on the back of the hand Split Cowhide on the palm of the hand

Cuff Material:Split CowhideLining:Foam & CottonStitching:DuPont™ Kevlar®Closure:Straight cuff

Applications

- Construction sites
- Wind energy
- Demolition & salvage
- Utility crews
- Shipyards

Oil pipelines

- Fabrication
- Manufacturing
- Steel Mills
- Oil & Gas
