Tillman 1325

Premium Goatskin TIG Glove with reinforced thumb and fingertip

The delicate touch you need with critical reinforcement in high wear areas for a longer glove life.

As TIG welders lay down the perfect bead of dimes, they need a glove that will provide the dexterity and touch they require. When we talked with TIG welders, we learned that while they love the thinness of a TIG glove they also discussed the heat build-up they experienced when welding. With everything, there are tradeoffs; with a thinner glove, heat build-up on the welding table can pass through the glove causing discomfort and continuous stress areas can wear through.

The Tillman 1325 TIG glove answers many challenges TIG welders face. The 1325 offers a second layer of rough side out Goatskin strategically placed on the thumb and index/forefinger. The reinforcement rests above the crease of the thumb and forefinger to ensure finger movement is not restricted. With this reinforcement we had to make sure the

tactile experience TIG welders require was not jeopardized – it is not. When the glove was tested, we learned firsthand that the reinforcement still allowed for a great feel and also added a slight tactile element that allowed for a great grip on a tungsten rod.

The 1325 also offers rough side out Goatskin that runs from the wrist to the tip of the pinky that acts like a heat shield and also provides added wear protection in this key area.

For welders to make that precise weld, they require a glove with a perfect fit. The 1325 has been slightly reduced in size so the glove has an impeccable fit on the welders hand. A large is still a large, it just offers a more precise fit.

When you try the 1325 on you find incredible dexterity, feel and fit for the most precise welds and most demanding TIG welders.

Features of the Tillman 1325 TIG Glove

- Made from Tillman's soft and supple top grain Goatskin that offers durable protection for the hand.
- Slightly undersized for outstanding tactile sensitivity.
- Designed to deliver an incredible feel and dexterity to the user.
- Reinforced rough side out Goatskin on the tip of the thumb and index finger for longer wear.
- A leather heat shield from the wrist to the tip of the pinky

eases movement and protects side of the glove and provides protection from heat.

- Straight thumb for best gun grip.
- Thumb strap reinforcement for added strength.
- 4" cuff with an inner liner for comfort and added protection.
- Sewn with DuPont™ Kevlar® thread to protect seams.
- Sizes: XS, S, M, L, XL, and 2X.
