Tillman 53 MIG Glove

Premium Cowhide. Outstanding Durability. Exceptional Comfort.

The most versatile and comfortable MIG glove you'll ever need.

This is the feedback we heard when we tested the Tillman 53 MIG glove.

All the accolades we heard for the Tillman 53 MIG glove began with one simple question...

What do you need in a MIG glove?

This was asked of welders when Tillman® started to design the Tillman 53 MIG glove. Comfortable, protection from the heat, reinforced high-wear areas, a glove I can use all day long, and a glove that fits. We they said okay show us what you mean, and the welders we talked to showed us what they meant. So...we developed a glove they asked for, the Tillman 53 MIG glove.

MIG welding is perhaps the most widely used form of welding. Throughout the day, MIG welders are performing other tasks in the shop or on the line so we wanted to develop the 53 for not only the comfort welders need for welding, but for the other tasks when prepping for a weld or handling materials. When we watched welders, we saw where additional reinforcements were needed as well as protection from heat, so we added these elements. Split Cowhide reinforcements on the palm, fingertips, the side of the palm and the thumb and thumb crotch. We also added breaks in the reinforcement areas to allow the hand and fingers to bend without restriction for a natural feel.

The 53 is constructed with Tillman's premium top and split grain Cowhide. Cowhide delivers outstanding protection from heat and abrasion. The lining of the glove is soft fleece to provide insulation for added protection from the heat with out adding bulk.

Tillman's Glide Patch™ offers an industry first, 10 millimeters of high density foam that wraps half of the forearm. This padding not only provides heat resistance from hot surfaces, it also provides some comfort when the user rests their forearm on a hard or edged surface.

For added protection from hot surfaces, Tillman added a strip of leather that extends from the side of the outer palm to the tip of the pinky that works as a heat shield. This heat shield also offers breaks in the leather at finger bend points allowing freedom of movement for the hand.

Today's welders are demanding more from a MIG glove, so the glove must adapt to multiple environments. As expectations and job requirements change, so do the requirements of the welder for his hand protection. The Tillman 53 delivers the comfort welders want and the protection they demand.

Features of the Tillman 53 MIG Glove

- Premium split Cowhide back and top grain Cowhide palm and resists heat and stays soft even when hot.
- Seamless forefinger.
- Fleece lined for added heat protection without the bulk.
- Keystone thumb for a great feel and gun grip.
- Palm, back of fingers and thumb strap reinforcement for extra strength.
- Tillman's Glide Patch™ offers a thick and cushioned 10 millimeters of high density cell foam that wraps half of the forearm.
- Breaks in the split Cowhide allow natural, unrestrictive movement and reducing hand fatigue.
- Cinched elastic back for snug fit.
- 5 ½" cuff for added protection.
- Sewn with DuPont™ Kevlar® for added strength.
- Sizes: S, M, L, XL, 2X, & 3X.

Applications

- MIG and Stick welding
- Plasma cutting
- Material handling
- Fabrication

The Brand Pros Demand

Description

The Tillman 53 is the perfect MIG glove when you're looking for a Drivers glove feel with a MIG glove. The 53 provides an extended Glide Patch™ for added comfort and a leather heat shield on the side of the palm for added heat resistance for long welds. You'll get the durability, comfort, and added protection with it's rough side out leather palm finger and thumb reinforcements.

The top grain Cowhide palm with reinforcements is incredibly thick yet soft to provide the touch and dexterity necessary. The split Cowhide back is durable and resists spark and spatter. The fleece lining adds heat and flame protection without bulkiness.

Features

- Premium split Cowhide back and top grain Cowhide palm resists heat and stays soft even when hot.
- Seamless forefinger.
- Fleece lined for added heat protection without the bulk.
- Keystone thumb for a great feel and gun grip.
- Palm, back of fingers, and thumb strap reinforcement for extra strength.
- Tillman's Glide Patch™ offers thick and cushioned 10 millimeters of high density foam that wraps half of the forearm.
- Breaks in the split Cowhide allow natural, unrestrictive movement, and reducing hand fatigue.
- Cinched elastic back for snug fit.
- 5 1/2" cuff for added protection.
- Sewn with DuPont™ Kevlar® for added strength.
- Sizes: S, M, L, XL, 2X.

Technical Specifications

Glove Material:	Palm, premium top grain Cowhide
Glove Material:	Back, Side split Cowhide
Cuff Material:	Split Cowhide
Lining:	Fleece
Stitching:	DuPont™ Kevlar®
Closure:	Cinched cuff

Applications

Construction sites:	Oil pipelines
Wind energy:	Demolition & salvage
Utility crews:	Ship building
Fabrication:	Manufacturing
Steel Mills:	Iron work
Oil & Gas:	Industrial construction
